Experience

Software Engineer II

Jul. 2026 – Now

Emburse

Toronto, ON

- Developed and maintained **Emburse Spend** 🔗, an expense management web application that helps businesses control card spending, collect receipts, manage reimbursements, and streamline approvals and accounting.
- Built and delivered full-stack features across the **React** and **Node.js** using **TypeScript**.
- Led the breakdown and execution of multiple Epics and projects, providing technical guidance and mentorship to teammates and collaborating with cross-functional teams to drive successful delivery.
- Redesigned the receipt upload workflow by replacing scheduled background processing with **AWS SNS**-based event-driven processing, accelerating the end-to-end receipt processing flow by **70%+**.
- Implemented the **Assurance** feature by integrating with the **AI** team to leverage an AI-powered receipt analysis API for detecting policy violations, such as restricted purchases and spending limits, while integrating with **Stripe** to dynamically update **subscription items** within existing user subscriptions.
- Contributed to a **FastAPI**-based (**Python**) vendor legitimacy Assurance check leveraging **OpenAI's Responses API**, mandatory web search, and YAML prompt configuration.
- Wrote **unit** and **integration tests** using **Jest** and **Mocha**, and implemented **end-to-end tests** using **Playwright**
- Used **Cursor** as the primary development tool and leveraged **Cursor Automations** to improve software engineering efficiency. Created AI-powered workflows including a **Sentry error triage workflow** that uses **Sentry**, **Slack**, **GitHub**, and **Coralogix MCPs** for automated error analysis and triage, and a **Snyk ticket workflow** that automatically creates Snyk ticket PRs with detailed implementation and test plans.

Full Stack Developer

Oct. 2024 – Jul. 2025

Next Inc.

Markham, ON

- Developed the platform "Nextchat" 🔗 using **Node.js**, **Express.js**, **React**, **MongoDB**, and **Redis**, providing users with low-code building experience for configuring AI Chatbots, AI Website Builders, E-Commerce and more.
- Integrated the headless open-source framework **Vendure** and **GraphQL** to build a modular e-commerce system, and implemented Stripe for online payments with support for revenue splitting.
- Developed a **FastAPI** microservice in **Python** for semantic search, integrating the **OpenAI Embedding API** and **Milvus** to support AI-powered, multilingual search of vendor descriptions.
- Developed an AI chatbot, integrating **OpenAI LLM** and **WebSocket**, enabling AI-powered customer support.
- Managed **AWS** infrastructure and deployment, including DNS, Nginx, Load Balancer, and **EC2**, containerized applications with **Docker**, and implemented automated **CI/CD** pipelines using **GitHub Actions**, reducing AWS expenses by **30%**.

Full Stack Developer

Sept. 2023 – Oct. 2024

Gelenk Networks Inc.

Markham, ON

- Developed both frontend and backend of a Web App "Unifans" 🔗 with over **500,000** registered users, utilizing **Node.js**, **Koa.js**, **Vue 3**, **TypeScript**, **CouchDB**, **Redis**, **AWS EC2**, **S3**, **Docker** and **Restful APIs**.
- Built a real-time messaging system utilizing **WebSockets** and **Redis**, achieving the ability to send images and videos online with **MD5** checksum verification and real-time compression functionality, using **multer** and **fluent-ffmpeg**.
- Integrated **Stripe**, **Paypal** and other payment gateways, supporting five payment methods.
- Developed an AI QRCode generator 🔗 with stable-diffusion, using **Python**, **Django** and **Vuetify**. Deployed the project on RunPod, achieving 300+ daily usage.

Full Stack Developer Intern

Sept. 2020 – May 2021

Inspur Group

Nanjing, China

- Developed a metrics collection and monitoring platform, processing 5 million real-time data points from data centers, and the corresponding Data Monitoring and Management System using **SpringBoot**, **MySQL**, **Kafka** and **React**.

Technical Skills

Programming Languages: JavaScript, Python, TypeScript, Java, HTML5/CSS, SQL, C/C++

Platforms and Frameworks: Node.js, React, VUE.js, Express.js, Django, SpringBoot, Redis, Kafka, Angular, Mocha, MySQL, PostgreSQL, MongoDB, CouchDB, MyBatis, Hibernate, EC2, S3, Lambda, Git, Docker, Linux, WordPress

Education

Western University

Sept. 2021 – July 2023

Master of Science in Computer Science, GPA: 4.0/4.0

London, Ontario

Southeast University

Sept. 2016 – May 2020

Bachelor of Science in Computer Science

Nanjing, China
